"Bioinformatics is the application of <u>computers</u> to the collection, archiving, organization, and analysis of <u>biological data</u>."

... A hybrid of biology and computer science

"Bioinformatics is the application of <u>computers</u> to the collection, archiving, organization, and analysis of <u>biological data</u>."

Bioinformatics is computer aided biology!

"Bioinformatics is the application of <u>computers</u> to the collection, archiving, organization, and analysis of <u>biological data</u>."

Bioinformatics is computer aided biology! Goal: Data to Knowledge

So what is structural bioinformatics?

So what is structural bioinformatics?

... computer aided structural biology!

Aims to characterize and interpret biomolecules and their assembles at the molecular & atomic level

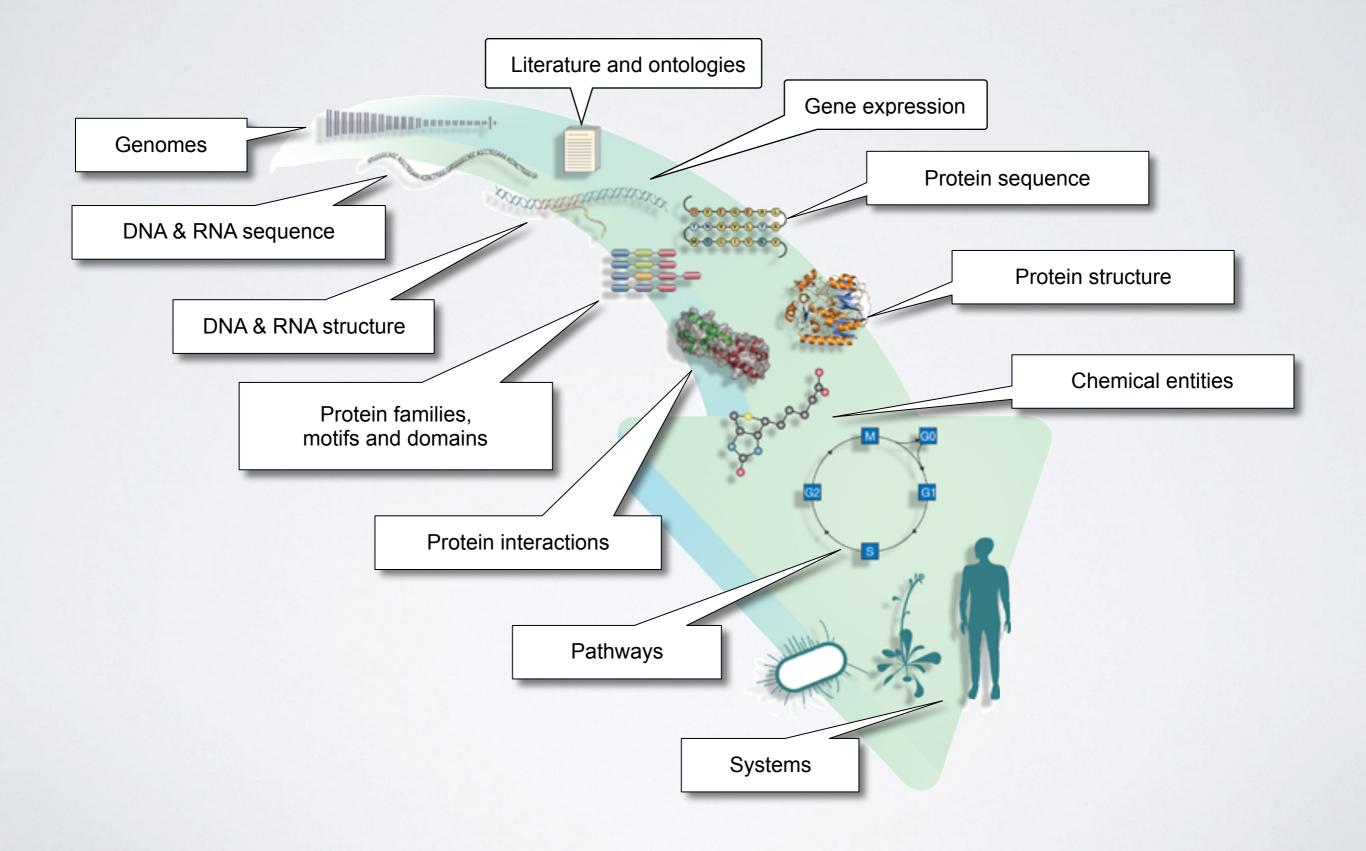

Why should we care?

Why should we care?

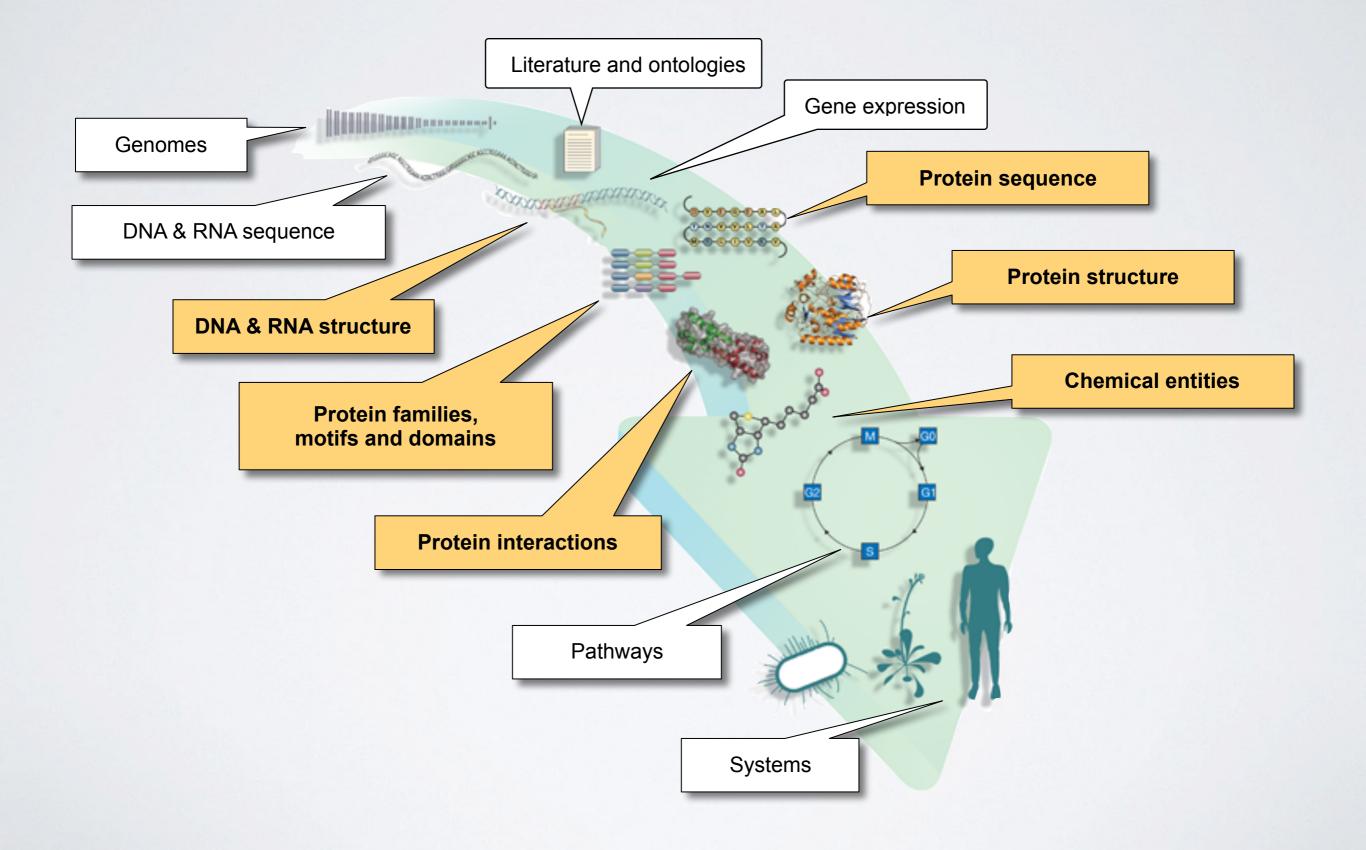

Because biomolecules are "nature's robots"

... and because it is only by coiling into specific 3D structures that they are able to perform their functions

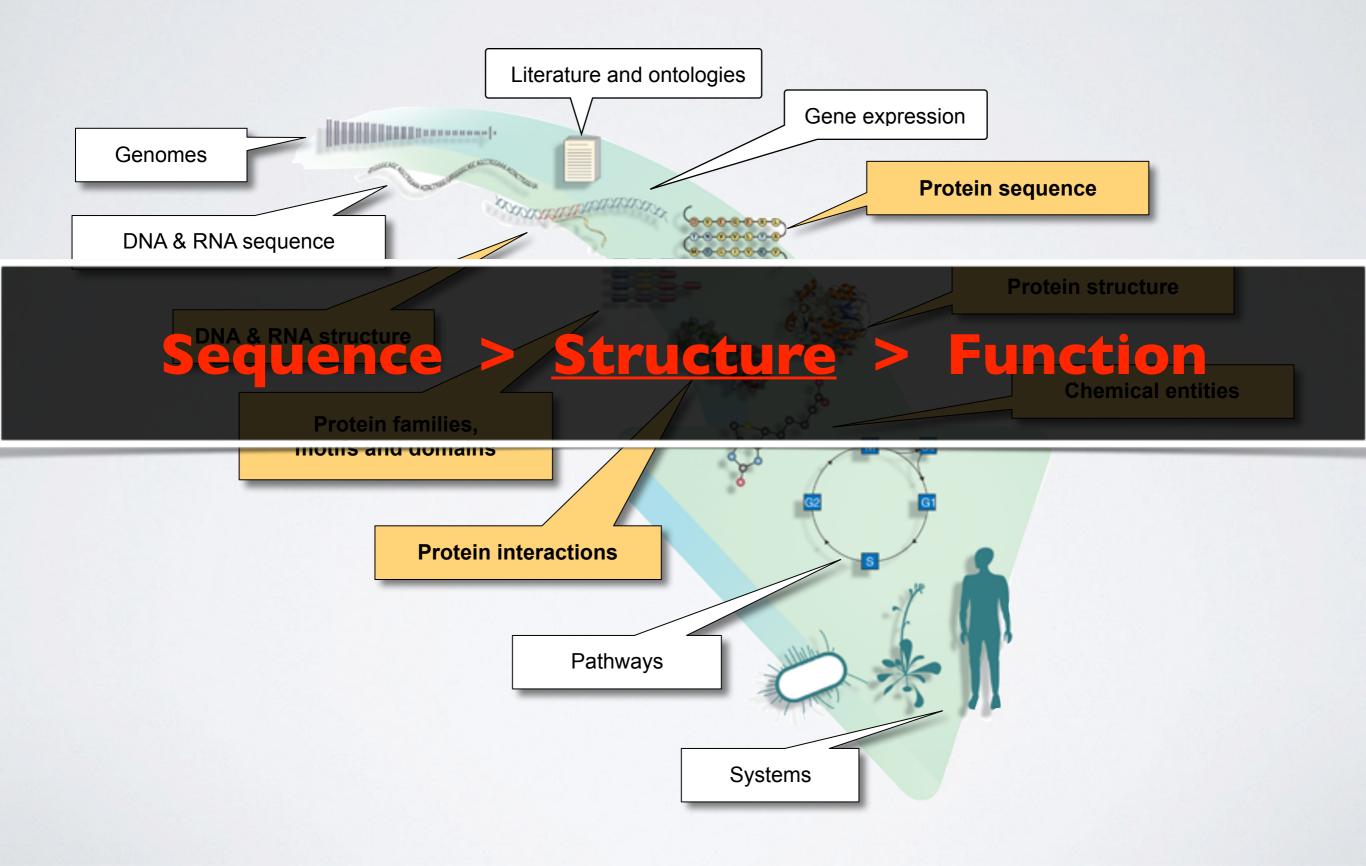

BIOINFORMATICS DATA

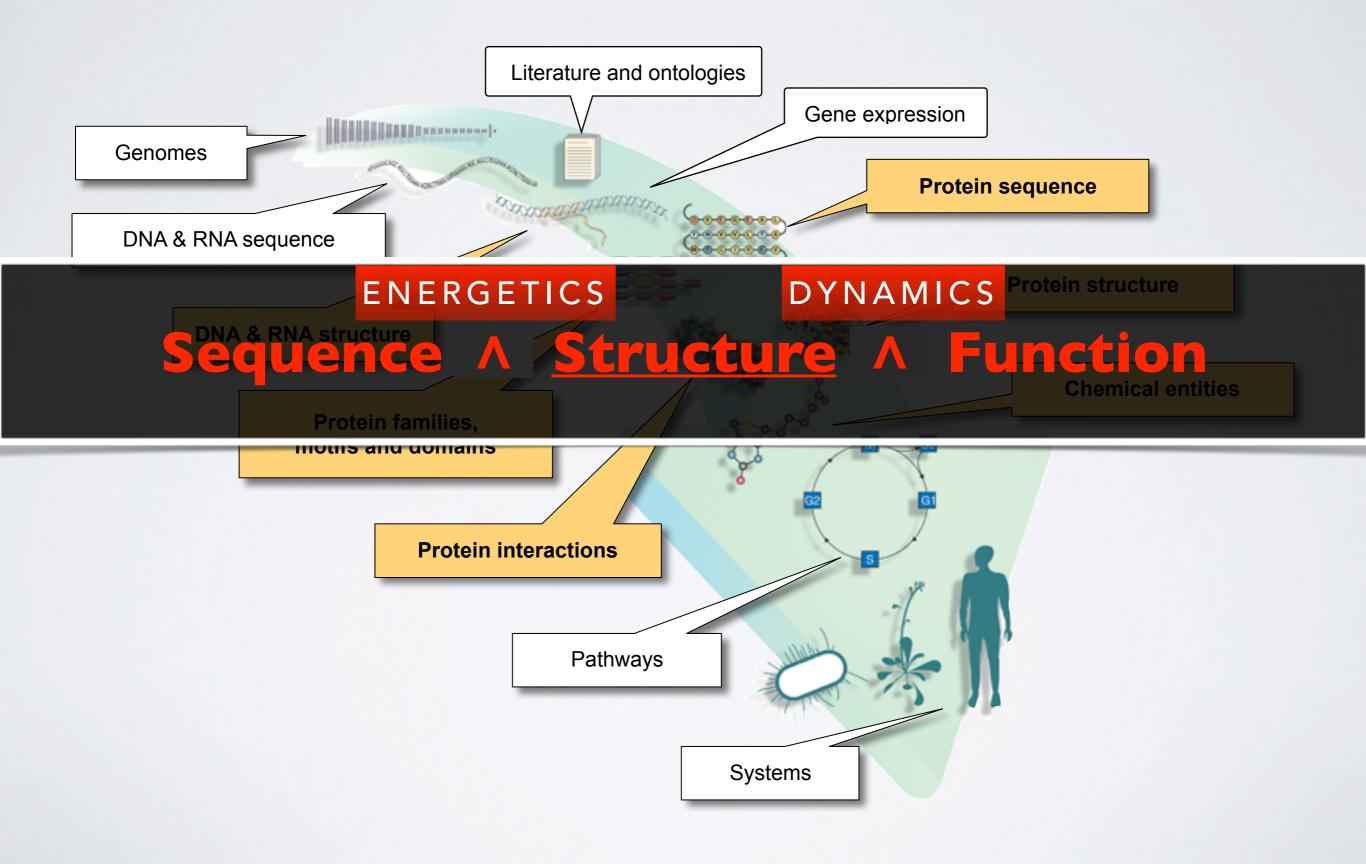

STRUCTURAL DATA IS CENTRAL

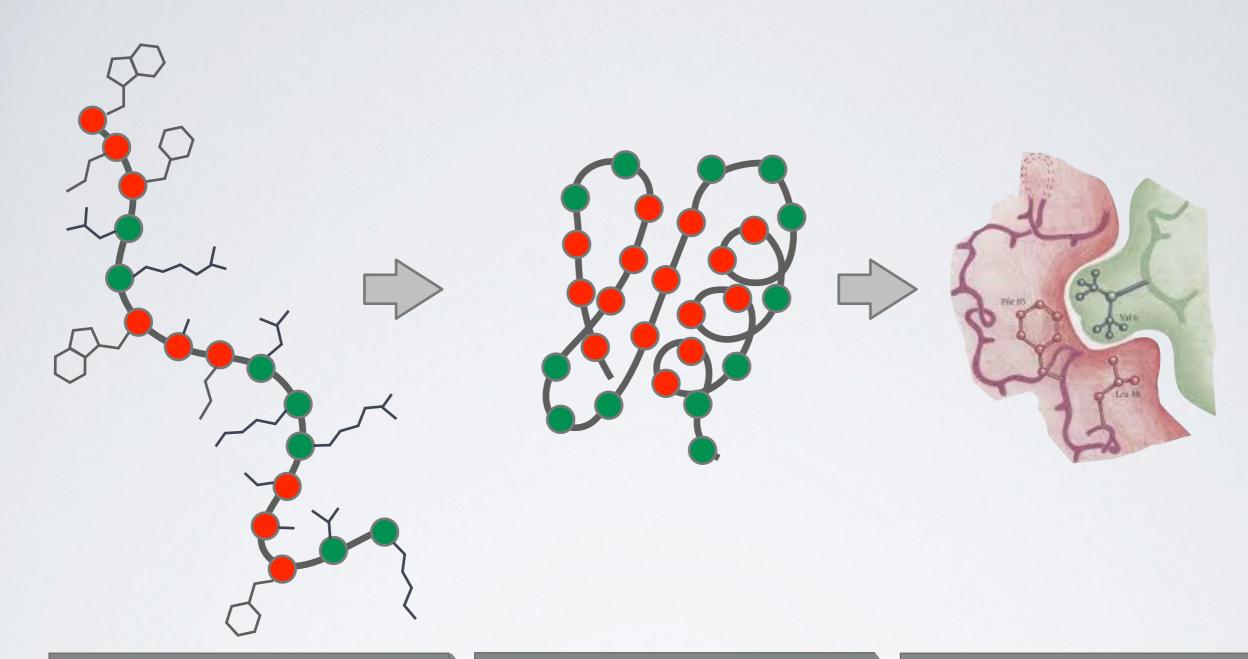

STRUCTURAL DATA IS CENTRAL

STRUCTURAL DATA IS CENTRAL

Sequence

- Unfolded chain of amino acid chain
- Highly mobile
- Inactive

Structure

- Ordered in a precise 3D arrangment
- Stable but dynamic

Function

- Active in specific ''conformations''
- Specific associations
 & precise reactions

In daily life, we use machines with functional *structure* and *moving parts*

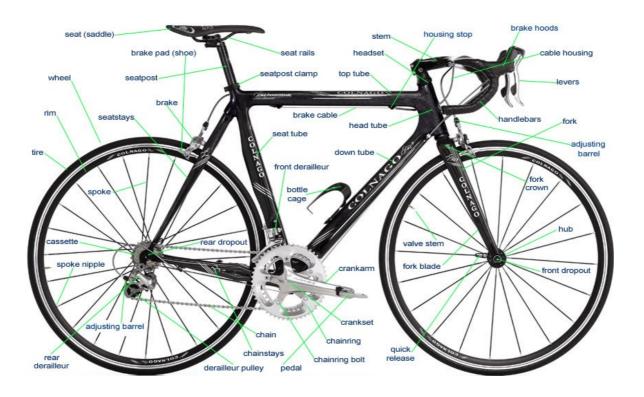

Genomics is a great start

Track Bike - DL175

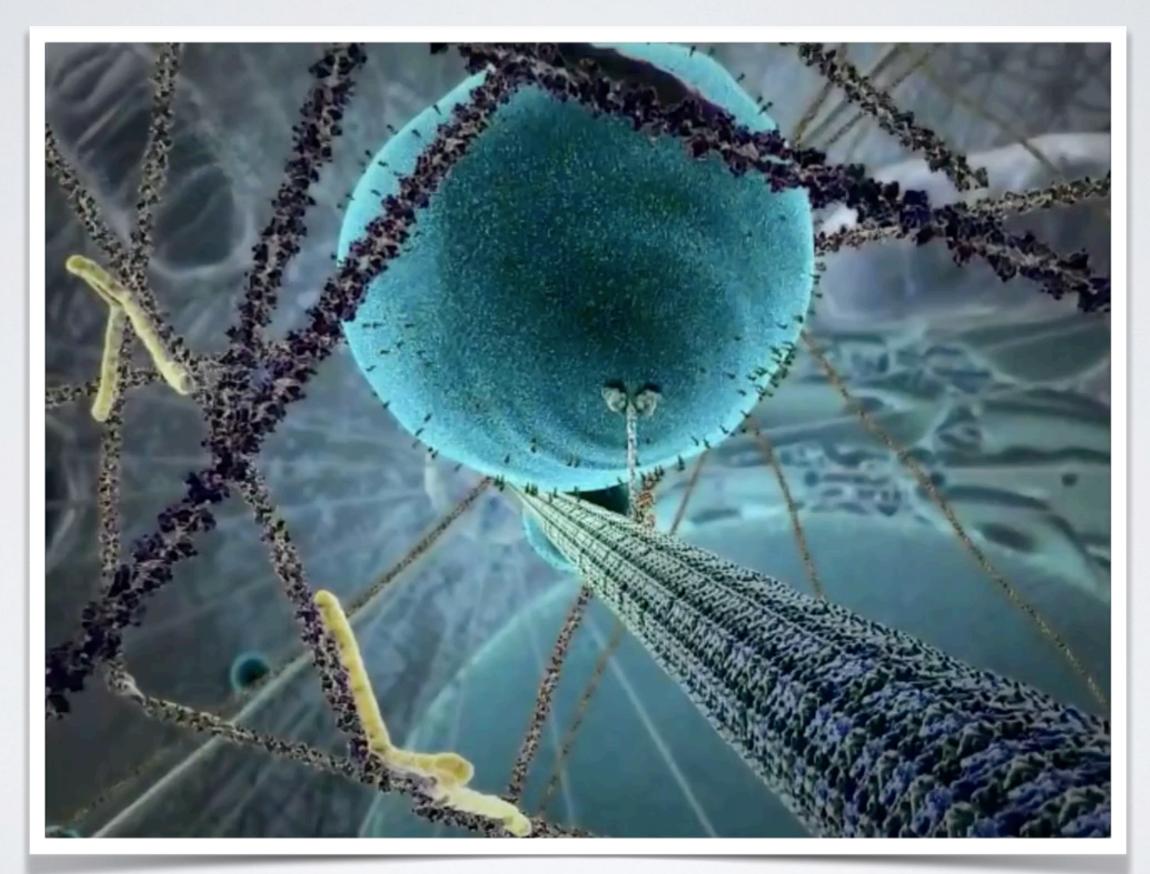

REF. NO.	IBM NO.	DESCRIPTION
1	156011	Track Frame 21", 22", 23", 24", Team Red
	157040	Fork for 21" Frame
2	157039	Fork for 22" Frame
2 2 2 3 4	157038	Fork for 23" Frame
2	157037	Fork for 24" Frame
з	191202	Handlebar TTT Competition Track Alloy 15/16"
4		Handlebar Stem, TTT, Specify extension
5	191278	Expander Bolt
5 6 7	191272	Clamp Bolt
7	145841	Headset Complete 1 x 24 BSC
8	145842	Ball Bearings
9	190420	175 Raleigh Pistard Seta Tubular Prestavalve 27"
10	190233	Rim, 27" AVA Competition (36H) Alloy Prestavalve
11	145973	Hub, Large Flange Campagnolo Pista Track Alloy (pairs)
12	190014	Spokes, 11 5/8"
13	145837	Sleeve
14	145636	Ball Bearings
15	145170	Bottom Bracket Axle
16	145838	Cone for Sleeve
17	146473	L.H. Adjustable Cup
18	145833	Lockring
19	145239	Straps for Toe Clips
20	145834	Fixing Bolt
21	145835	Fixing Washer
22	145822	Dustcap
23	145823	R.H. and L.H. Crankset with Chainwheel
24	146472	Fixed Cup
25	145235	Toe Clips, Christophe, Chrome (Medium)
26	145684	Pedals, Extra Light, Pairs
27	123021	Chain
28	145980	Seat Post
29		Seat Post Bolt and Nut
30	167002	Saddle, Brooks
31	145933	Track Sprocket, Specify 12, 13, 14, 15, or 16 T.

 But a parts list is not enough to understand how a bicycle works

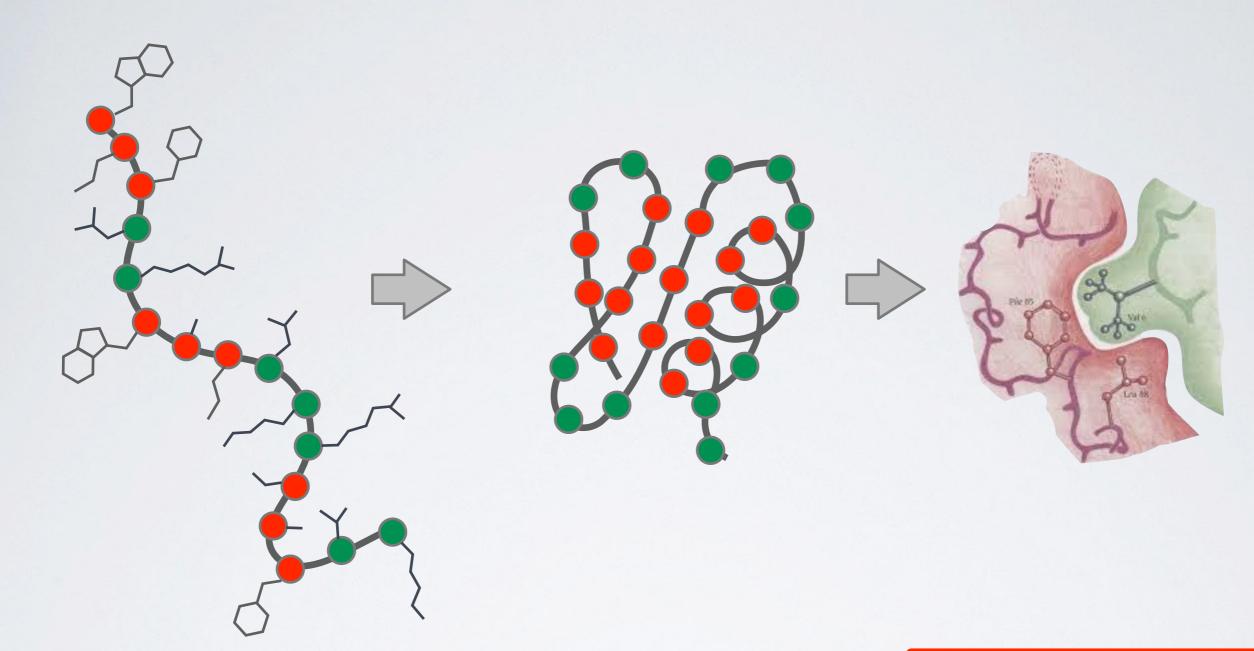

... but not the end

- We want the full spatiotemporal picture, and an ability to control it
- Broad applications, including drug design, medical diagnostics, chemical manufacturing, and energy

Extracted from The Inner Life of a Cell by Cellular Visions and Harvard [YouTube link: <u>https://www.youtube.com/watch?v=y-uuk4Pr2i8</u>]

Sequence

PDB – A Billion Atom Archive

> 1 billion atoms in the asymmetric units

~146,000 Structures as of Nov 2018

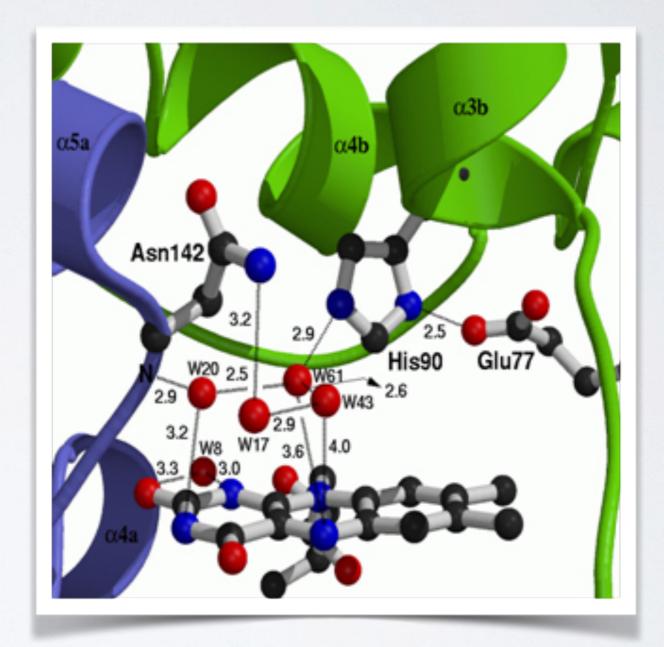

UC San Diego

DSC SAN DIEGO SUPERCOMPUTER CENTER

Slide Credit: Peter Rose

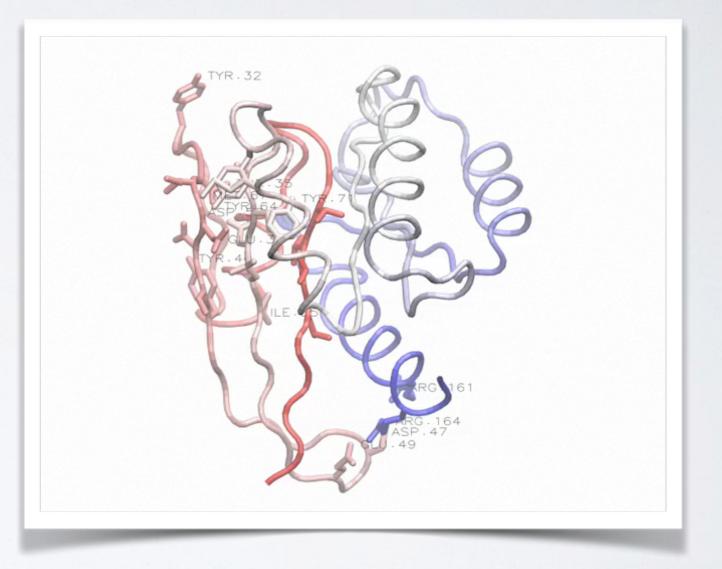

Motivation 1: Detailed understanding of molecular interactions

Provides an invaluable structural context for conservation and mechanistic analysis leading to functional insight.

Motivation 1: Detailed understanding of molecular interactions

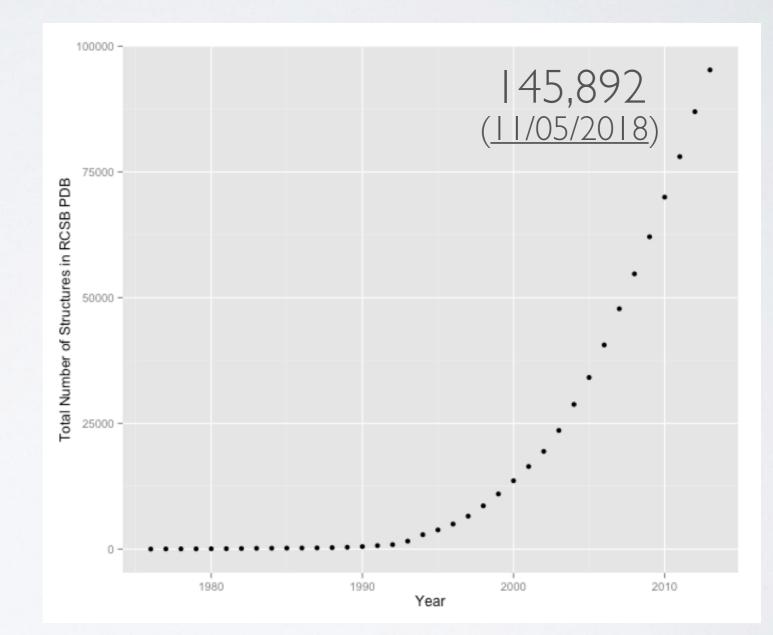

Computational modeling can provide detailed insight into functional interactions, their regulation and potential consequences of perturbation.

Grant et al. PLoS. Comp. Biol. (2010)

Motivation 2: Lots of structural data is becoming available

Structural Genomics has contributed to driving down the cost and time required for structural determination

Data from: <u>https://www.rcsb.org/stats/</u>

Motivation 2: Lots of structural data is becoming available

Structural Genomics has contributed to driving down the cost and time required for structural determination

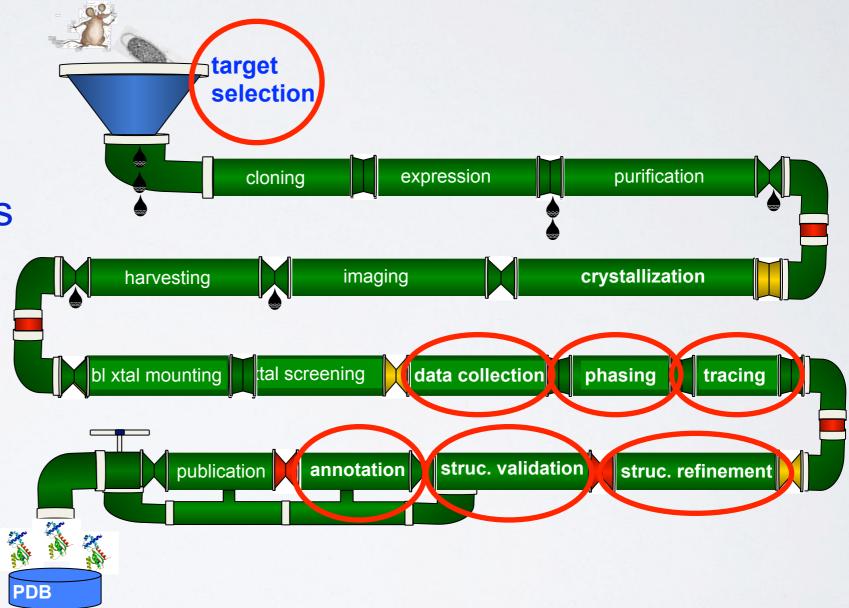

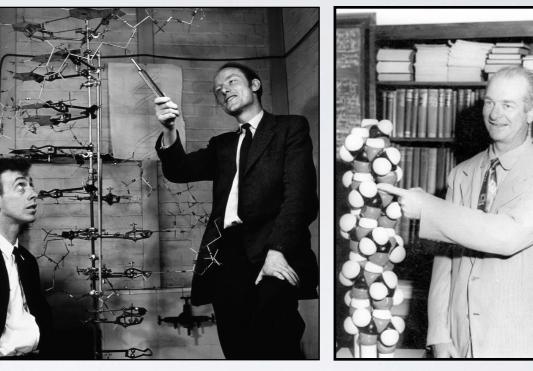

Image Credit: "Structure determination assembly line" Adam Godzik

Motivation 3:

Theoretical and computational predictions have been, and continue to be, enormously valuable and influential!

SUMMARY OF KEY MOTIVATIONS

Sequence > Structure > Function

 Structure determines function, so understanding structure helps our understanding of function

Structure is more conserved than sequence

Structure allows identification of more distant evolutionary relationships

Structure is encoded in sequence

 Understanding the determinants of structure allows design and manipulation of proteins for industrial and medical advantage

MAJOR RESEARCH AREAS AND CHALLENGES

Include but are not limited to:

- Protein classification
- Structure prediction from sequence
- Binding site detection
- Binding prediction and drug design
- Modeling molecular motions
- Predicting physical properties (stability, binding affinities)
- Design of structure and function
- etc...

With applications to Biology, Medicine, Agriculture and Industry

Today's Menu

- Overview of structural bioinformatics
 - Motivations, goals and challenges
- Fundamentals of protein structure
 - Structure composition, form and forces
- Representing, interpreting & modeling protein structure
 - Visualizing & interpreting protein structures
 - Analyzing protein structures
 - Modeling energy as a function of structure

HIERARCHICAL STRUCTURE OF PROTEINS

Primary > Secondary > Tertiary > Quaternary

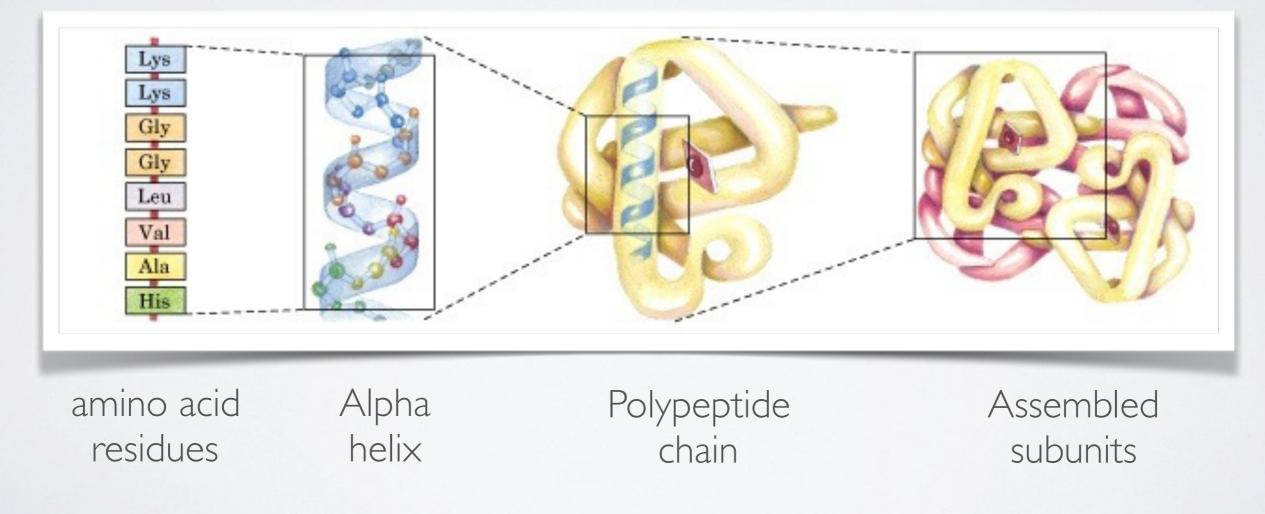

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

RECAP: AMINO ACID NOMENCLATURE

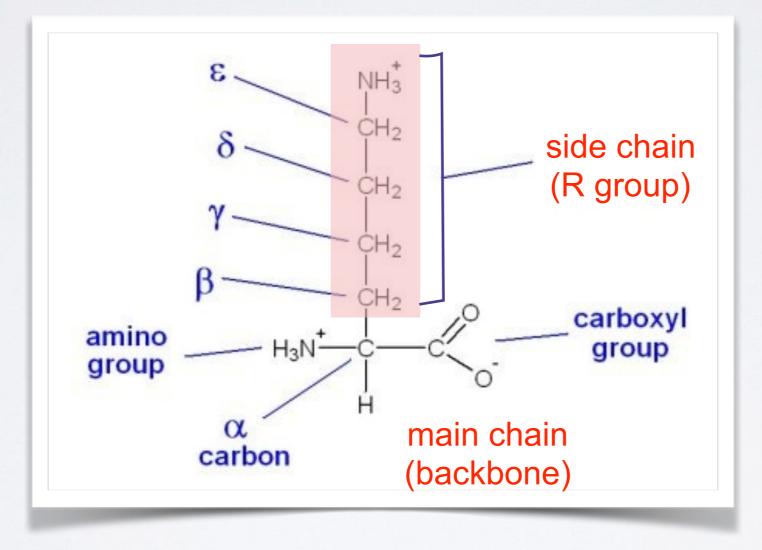

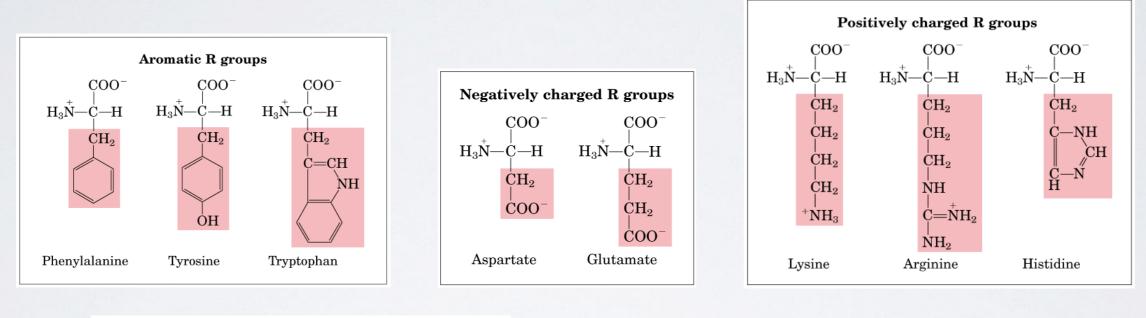

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

AMINO ACIDS CAN BE GROUPED BY THE **PHYSIOCHEMICAL PROPERTIES**

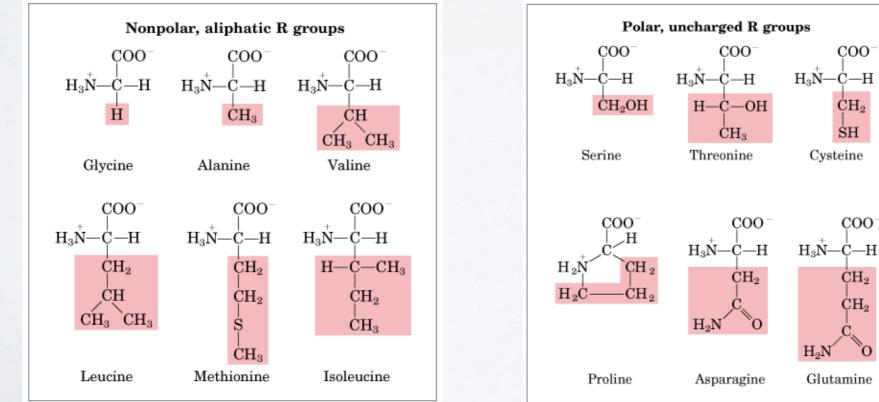

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

0

AMINO ACIDS POLYMERIZE THROUGH PEPTIDE BOND FORMATION

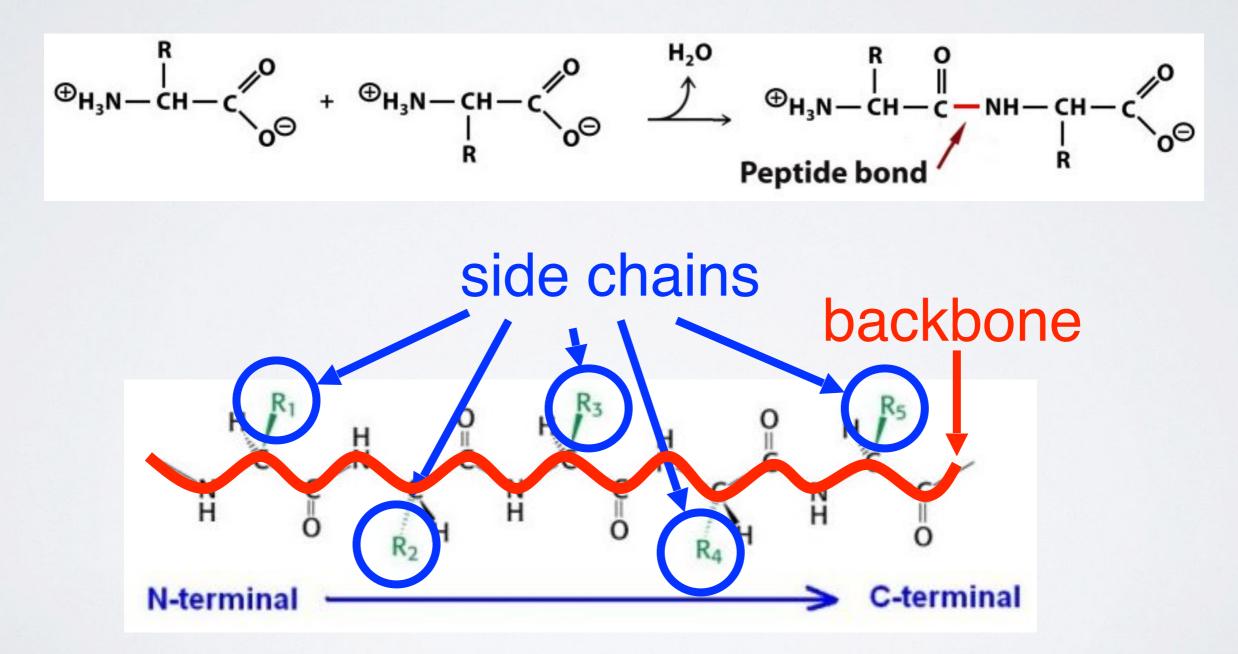

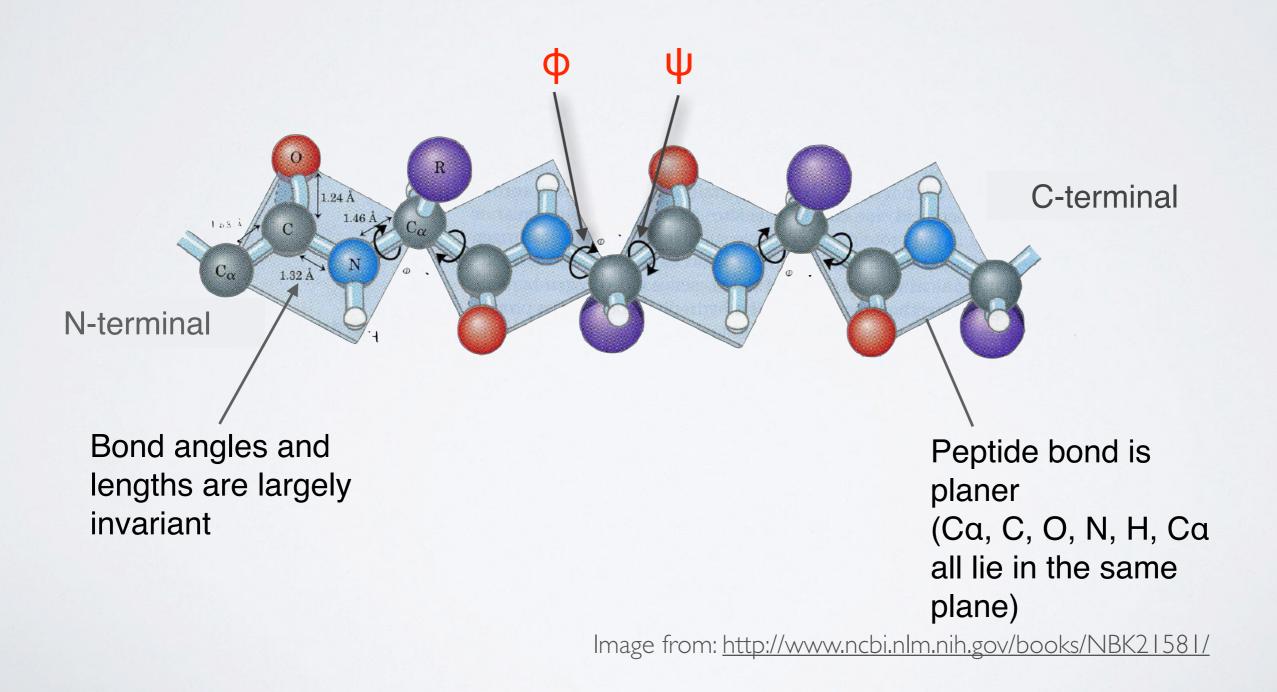

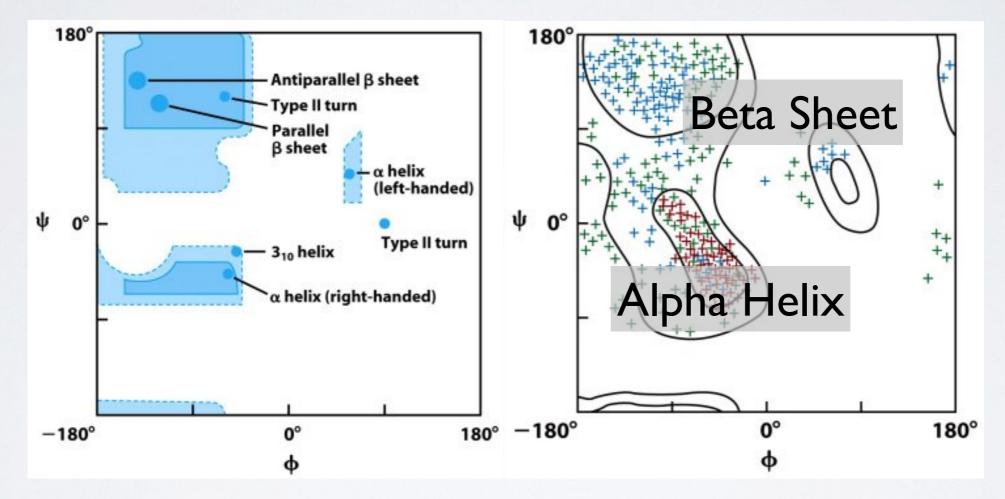

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

PEPTIDES CAN ADOPT DIFFERENT CONFORMATIONS BY VARYING THEIR PHI & PSI BACKBONE TORSIONS

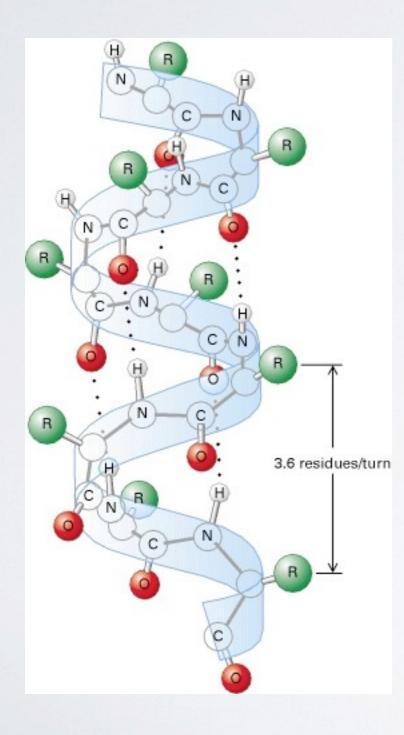

PHI vs PSI PLOTS ARE KNOWN AS RAMACHANDRAN DIAGRAMS

- Steric hindrance dictates torsion angle preference
- Ramachandran plot show preferred regions of ϕ and ψ dihedral angles which correspond to major forms of secondary structure

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

MAJOR SECONDARY STRUCTURE TYPES ALPHA HELIX & BETA SHEET

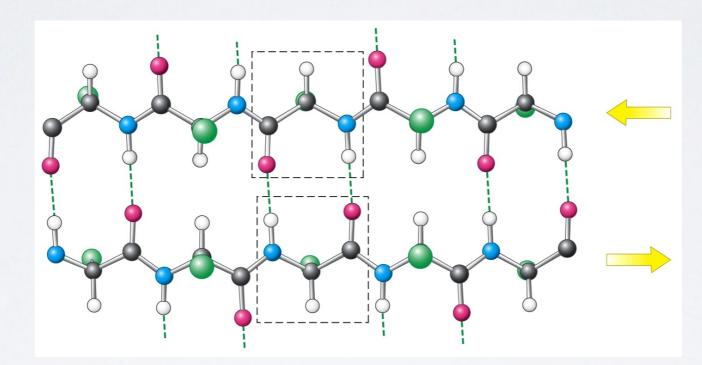

a-helix

- Most common from has <u>3.6 residues per</u> <u>turn</u> (number of residues in one full rotation)
- Hydrogen bonds (dashed lines) between residue <u>i and i+4</u> stabilize the structure
- The side chains (in green) protrude
 outward
- 3_{10} -helix and π -helix forms are less common

Image from: http://www.ncbi.nlm.nih.gov/books/NBK21581/

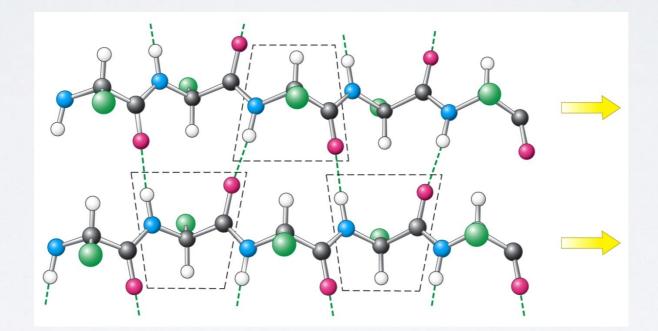

MAJOR SECONDARY STRUCTURE TYPES ALPHA HELIX & **BETA SHEET**

In antiparallel β -sheets

- Adjacent β-strands run in <u>opposite</u> directions
- Hydrogen bonds (dashed lines) between NH and CO stabilize the structure
- The side chains (in green) are above and below the
 sheet
 Image from: <u>http://www.ncbi.nlm.nih.gov/books/NBK21581/</u>

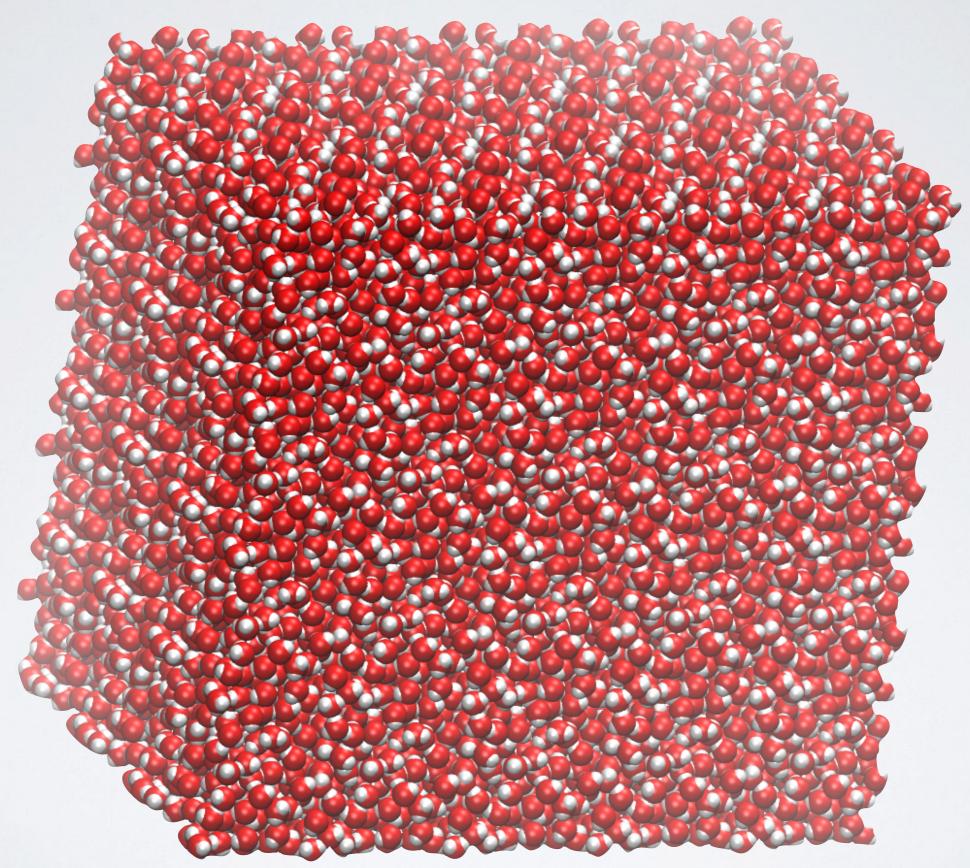

MAJOR SECONDARY STRUCTURE TYPES ALPHA HELIX & **BETA SHEET**

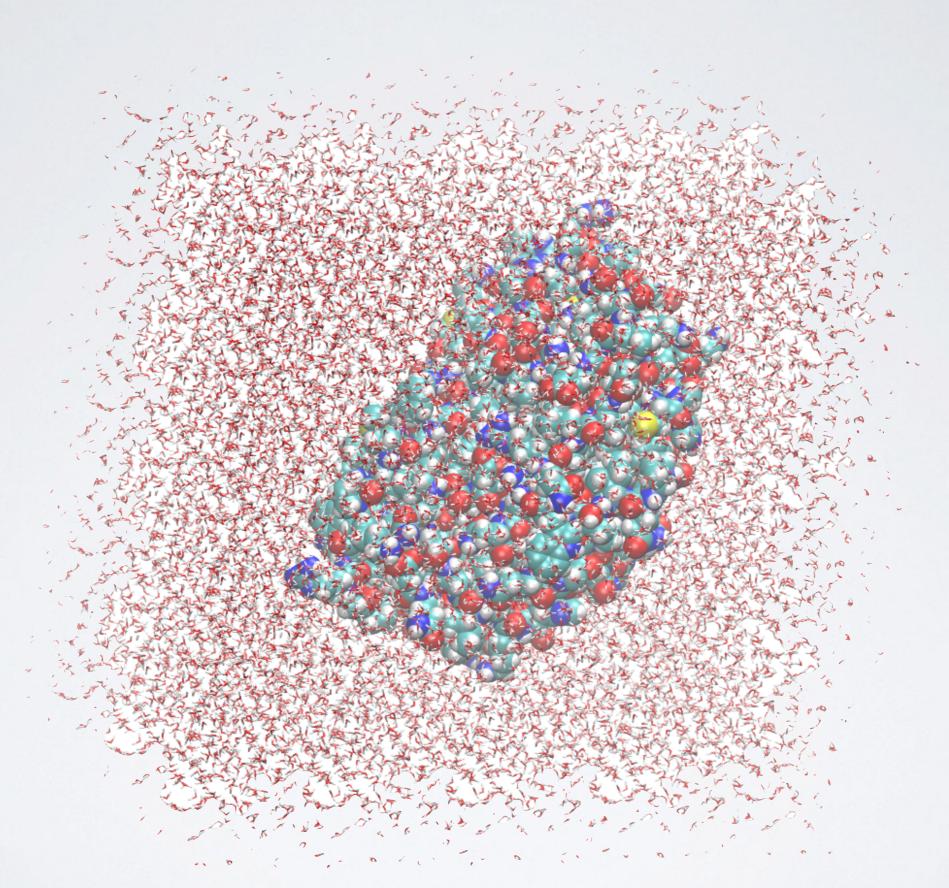

In parallel β -sheets

- Adjacent β-strands run in <u>same</u> direction
- Hydrogen bonds (dashed lines) between NH and CO stabilize the structure
- The side chains (in green) are above and below the
 sheet
 Image from: <u>http://www.ncbi.nlm.nih.gov/books/NBK21581/</u>

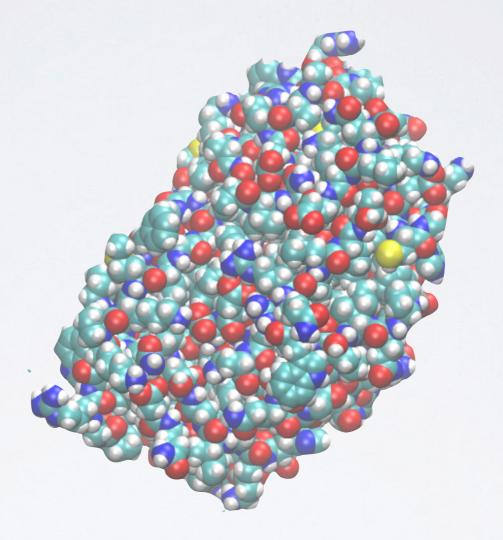

What Does a Protein Look like?

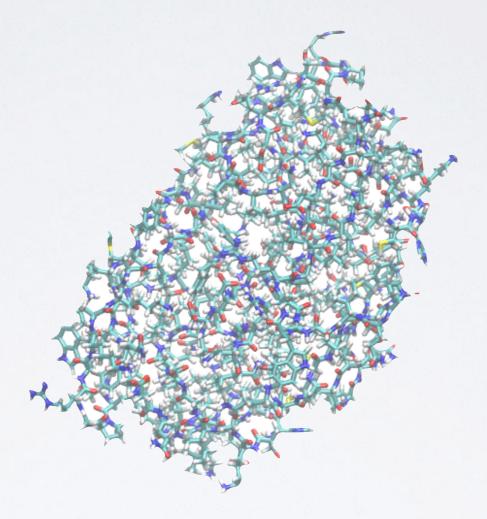

• Proteins are stable (and hidden) in water

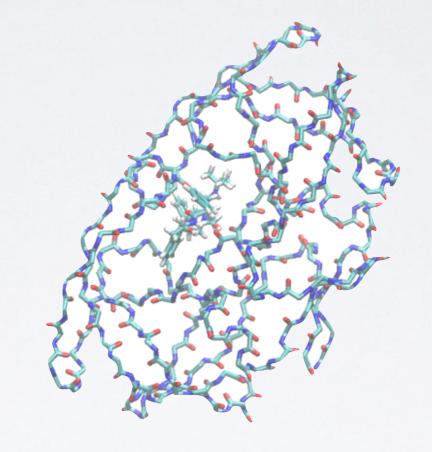

Proteins closely interact with water

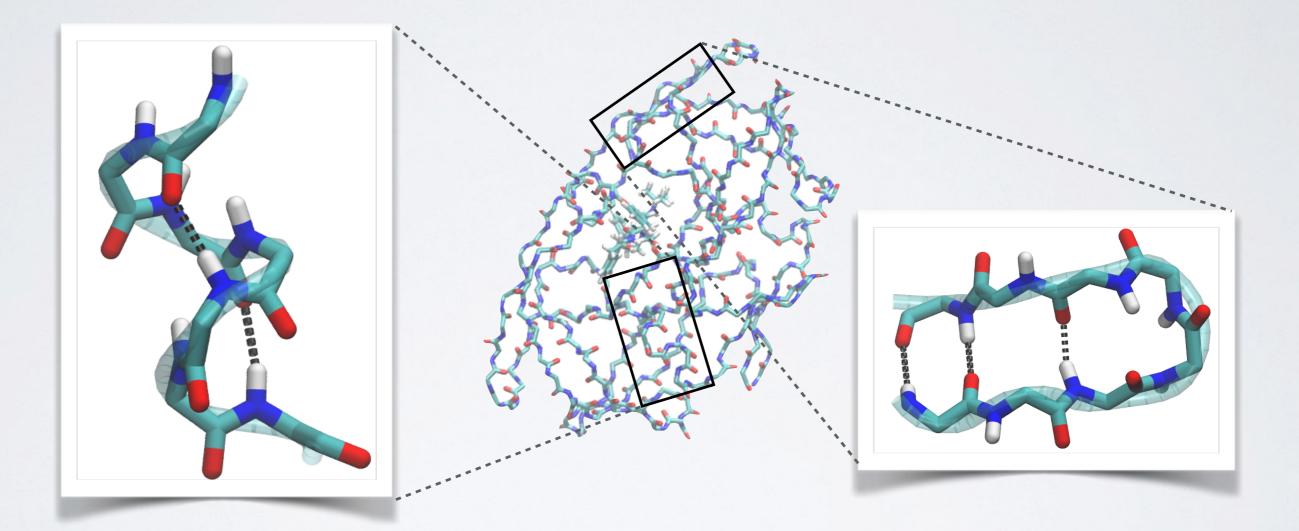

Proteins are close packed solid but flexible objects (globular)

 Due to their large size and complexity it is often hard to see whats important in the structure

 Backbone or main-chain representation can help trace chain topology

 Backbone or main-chain representation can help trace chain topology & reveal secondary structure

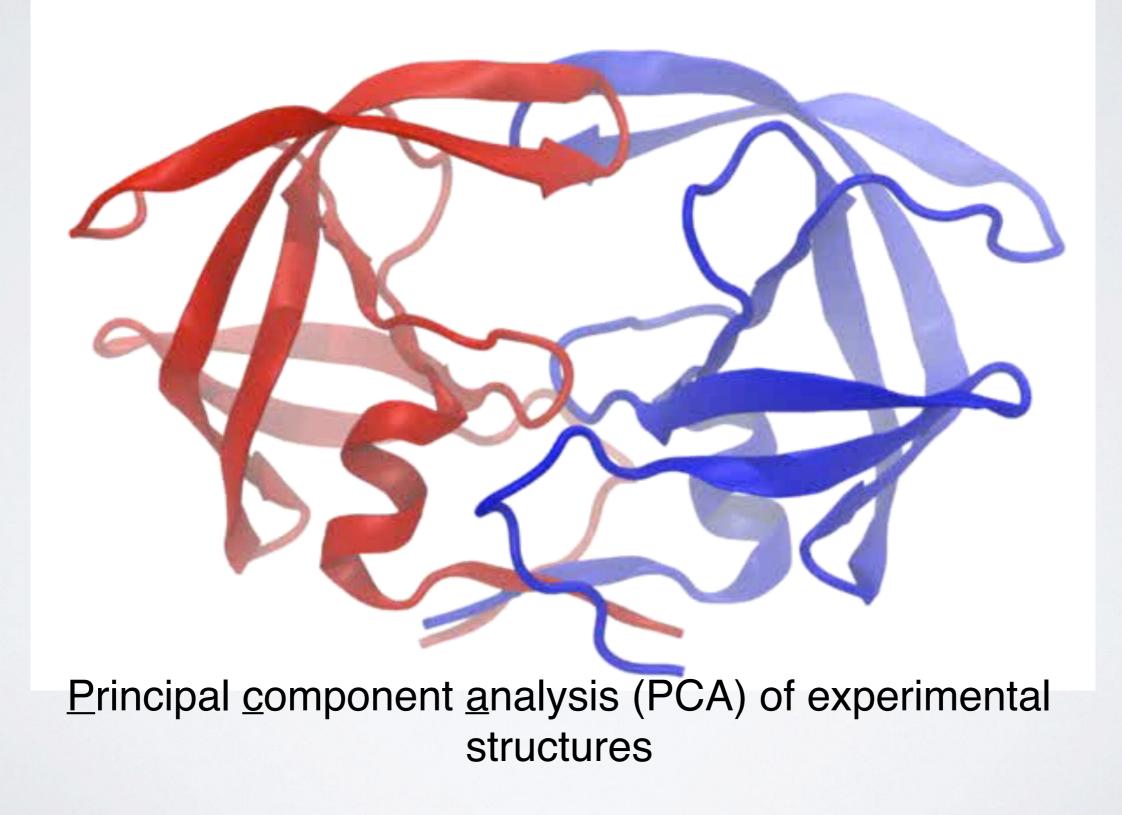

- Simplified secondary structure representations are commonly used to communicate structural details
- Now we can clearly see 2°, 3° and 4° structure
- Coiled chain of connected secondary structures

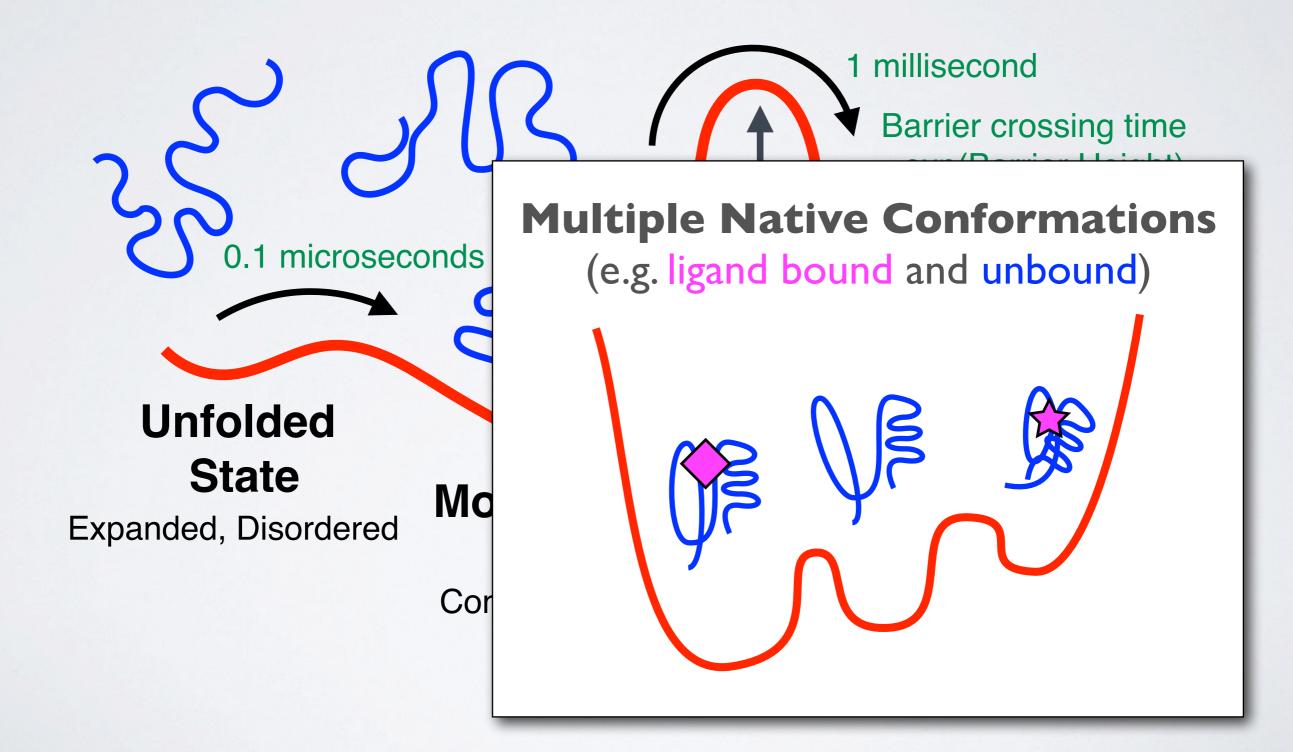

DISPLACEMENTS REFLECT INTRINSIC FLEXIBILITY

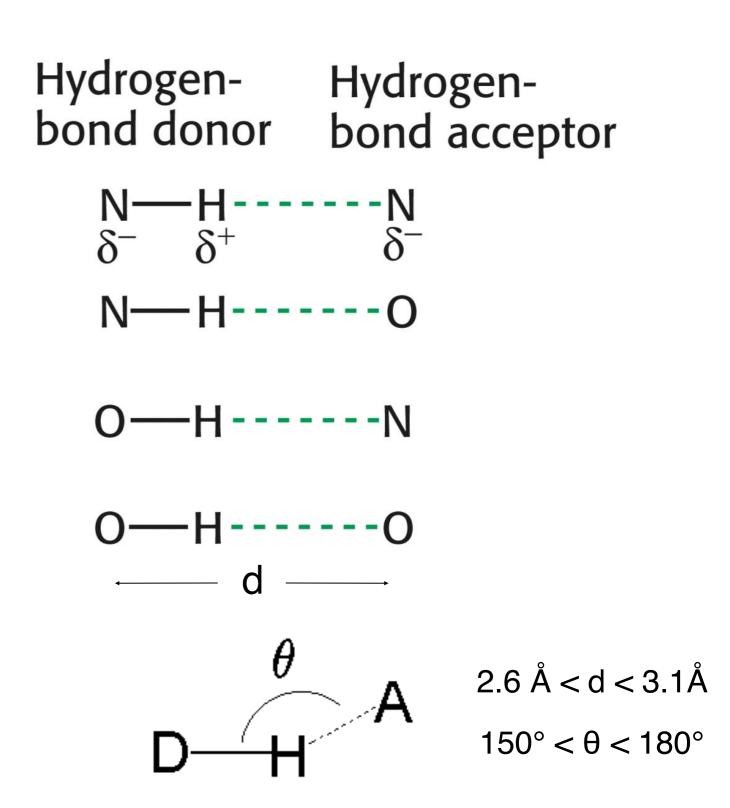

DISPLACEMENTS REFLECT INTRINSIC FLEXIBILITY

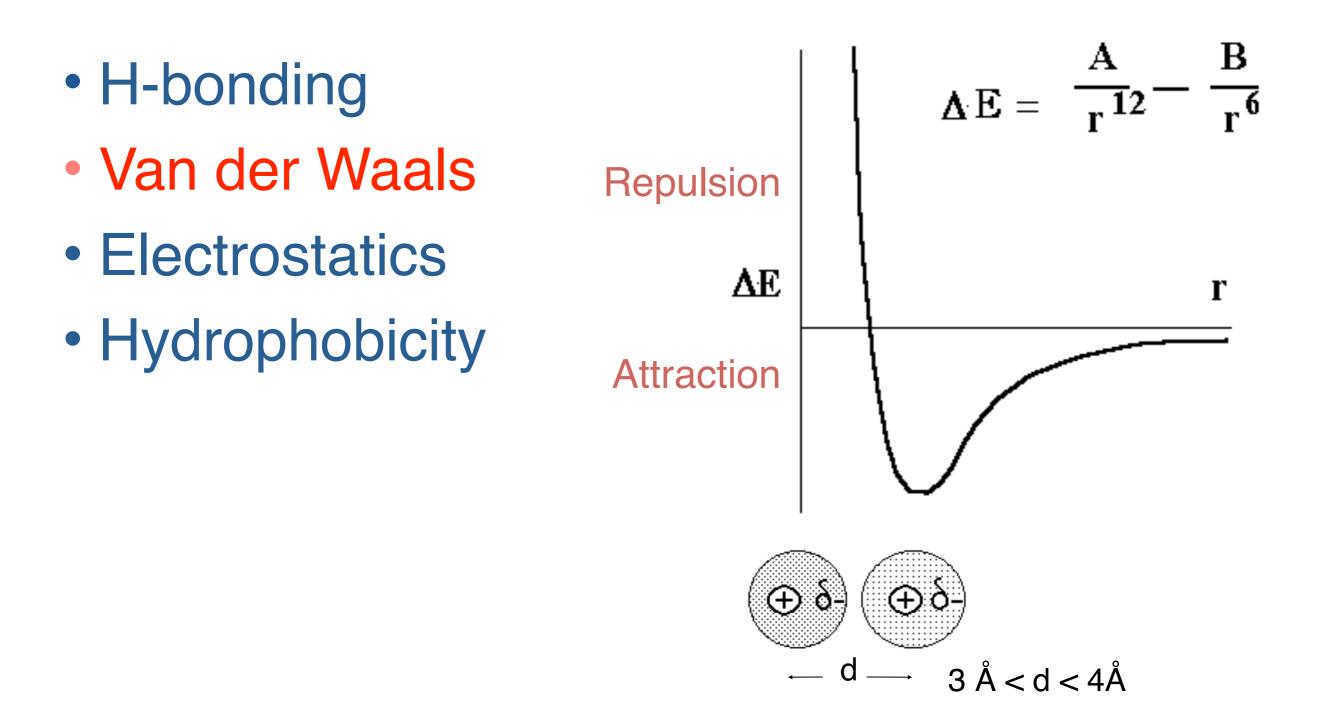

KEY CONCEPT: ENERGY LANDSCAPE

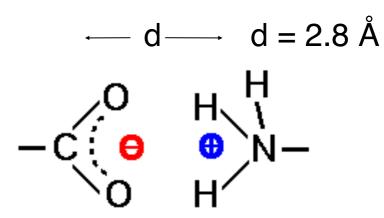

- H-bonding
- Van der Waals
- Electrostatics
- Hydrophobicity

- H-bonding
- Van der Waals
- Electrostatics
- Hydrophobicity

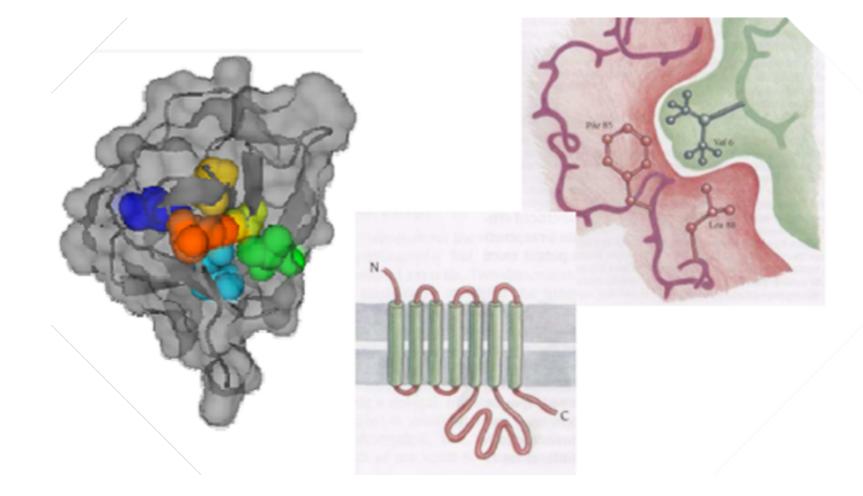

carboxyl group and amino group

(some time called IONIC BONDs or SALT BRIDGEs)

$\begin{array}{ccc} & \mathbf{Coulomb's law} \\ \mathbf{q}_{1} & \mathbf{q}_{2} \\ & \mathbf{O} & \mathbf{r} & \mathbf{O} \\ & \mathbf{F} & \mathbf{O} \\ & \mathbf{F} & \mathbf{O} \\ & \mathbf{F} & \mathbf{F} & \mathbf{F} \\ & \mathbf{F} & \mathbf{F}$	E = Energy k = constant D = Dielectric constant (vacuum = 1; H ₂ O = 80) $q_1 \& q_2 = electronic charges (Coulombs)$ r = distance (Å)
---	---

- H-bonding
- Van der Waals
- Electrostatics
- Hydrophobicity

The force that causes hydrophobic molecules or nonpolar portions of molecules to aggregate together rather than to dissolve in water is called <u>Hydrophobicity</u> (Greek, "water fearing"). This is not a separate bonding force; rather, it is the result of the energy required to insert a nonpolar molecule into water.

SIDE-NOTE: PDB FILE FORMAT

• **PDB files** contains atomic coordinates and associated information.

https://bioboot.github.io/bimm143_W19/lectures/#11 Focus on section 2 of "Lab Sheet" (using VMD)

Today's Menu

- Overview of structural bioinformatics
 - Motivations, goals and challenges
- Fundamentals of protein structure
 - Structure composition, form and forces
- Representing, interpreting & modeling protein structure
 - Visualizing and interpreting protein structures
 - Analyzing protein structures
 - Modeling energy as a function of structure

Hand-on time!

Do in Louis Solar

https://bioboot.github.io/bimm143_S19/lectures/#11

Focus on section 3 to 5

Side Note: Section 4.1

- Download MUSCLE for your OS from: <u>https://www.drive5.com/muscle/downloads.htm</u>
- On **MAC** use your TERMINAL to enter the commands:

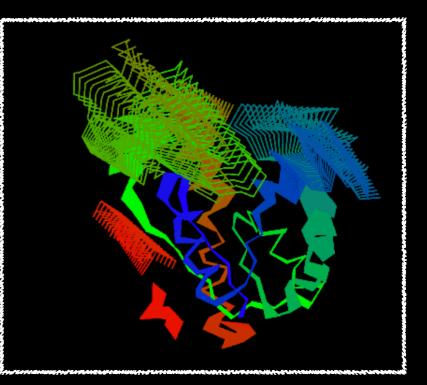

> tar -xvf ~/Downloads/muscle3.8.31_i86darwin32.tar
> sudo mv muscle3.8.31_i86darwin32 /usr/local/bin/muscle

- On **Windows** use file explorer to:
 - Move the downloaded muscle3.8.31_i86win32.exe from your <u>Downloads</u> folder to your <u>Project</u> folder.
 - Then right click to rename to muscle.exe

>./muscle.exe -version

Bio3D view()

 If you want the 3D viewer in your R markdown you can install the development version of bio3d.view

• In your R console:

> install.packages("devtools")

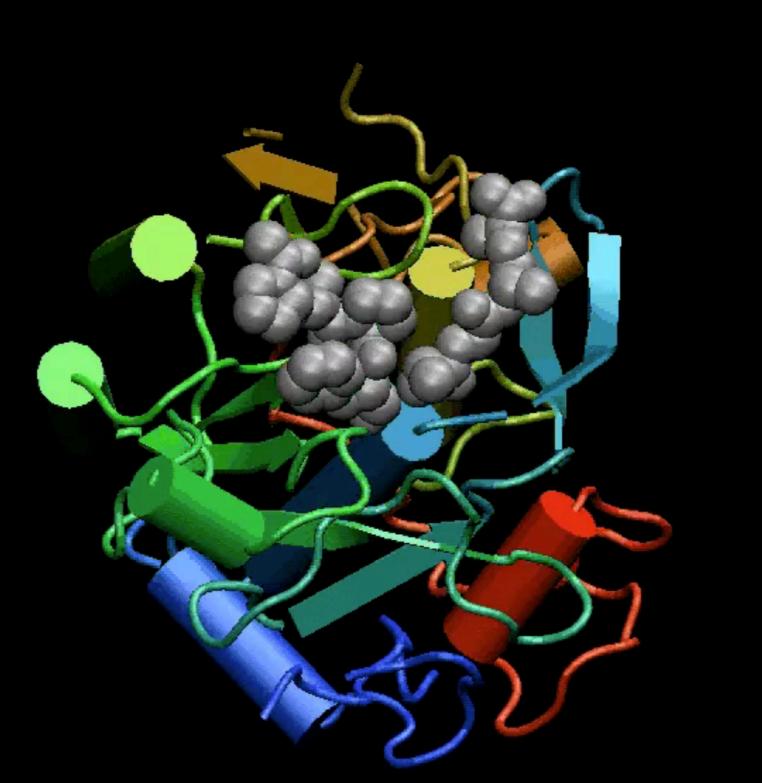

- > devtools::install_bitbucket("Grantlab/bio3d-view")
- To use in your R session:

> library("bio3d.view")
> pdb <- read.pdb("5p21")
> view(pdb)
> view(pdb, "overview", col="sse")

Today's Menu

- Overview of structural bioinformatics
 - Motivations, goals and challenges
- Fundamentals of protein structure
 - Structure composition, form and forces
- Representing, interpreting & modeling protein structure
 - Visualizing and interpreting protein structures
 - Analyzing protein structures
 - Modeling energy as a function of structure

NMA models the protein as a network of elastic strings

Proteinase K

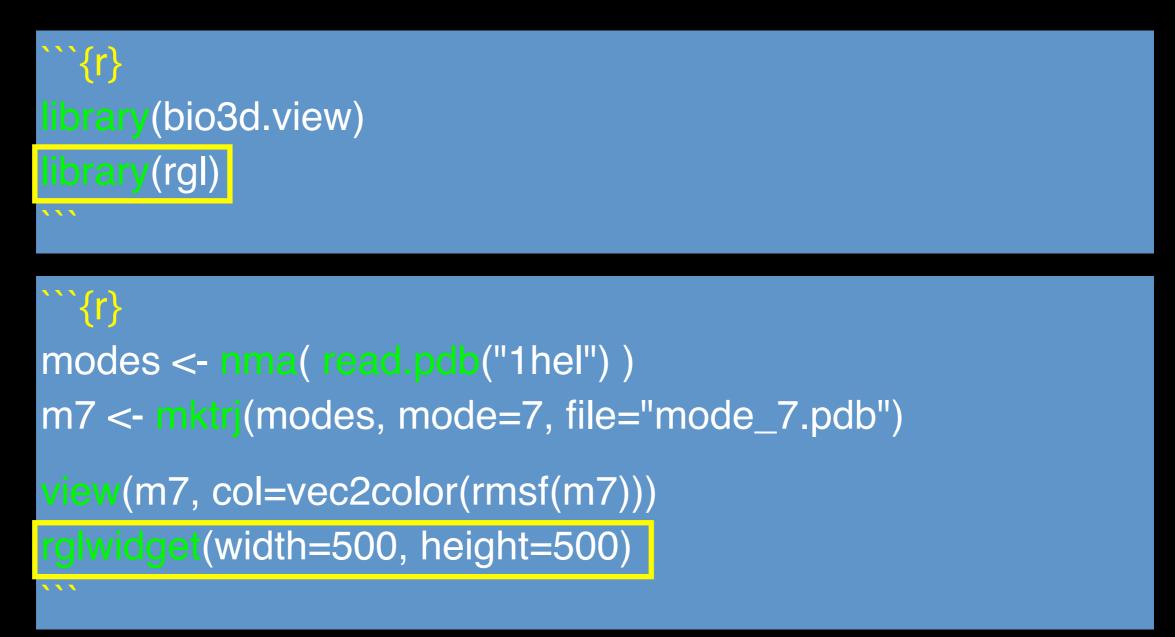

NMA in Bio3D

 Normal Mode Analysis (NMA) is a bioinformatics method that can predict the major motions of biomolecules.

```
library(bio3d)
library(bio3d.view)
pdb <- read.pdb("1hel")</pre>
modes <- nma( pdb )
m7 <- mktri(modes, mode=7, file="mode_7.pdb")
view(m7, col=vec2color(rmsf(m7)))
```

Bio3D view()

 If you want the interactive 3D viewer in Rmd rendered to output: html_output document:

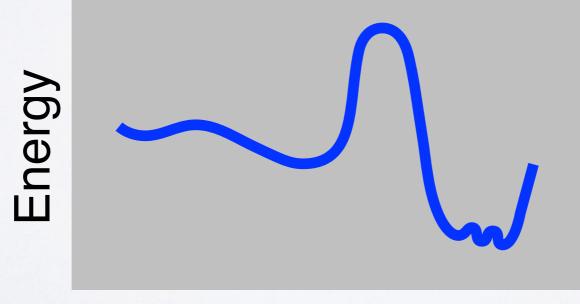

KEY CONCEPT: POTENTIAL FUNCTIONS DESCRIBE A SYSTEMS **ENERGY** AS A FUNCTION OF ITS **STRUCTURE**

Two main approaches: (1). Physics-Based (2). Knowledge-Based

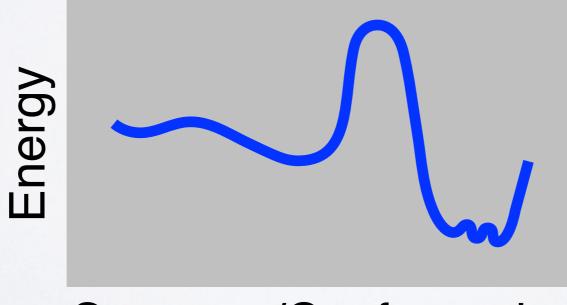

KEY CONCEPT: POTENTIAL FUNCTIONS DESCRIBE A SYSTEMS ENERGY AS A FUNCTION OF ITS STRUCTURE

Two main approaches: (1). Physics-Based (2). Knowledge-Based

Structure/Conformation

This will be the focus of the next class!

Structure/Conformation

SUMMARY

- Structural bioinformatics is computer aided structural biology
- Described major motivations, goals and challenges of structural bioinformatics
- Reviewed the fundamentals of protein structure
- Explored how to use R to perform advanced custom structural bioinformatics analysis!

 Introduced both physics and knowledge based modeling approaches for describing the structure, energetics and dynamics of proteins computationally

Muddy Point Assessment
